

MaatiiLink

Product Requirements Document

Version 1.0 | May 2026

Team: SABA CODERS

Client: Cooperative Bank of Oromia

COOP DX Valley, Addis Ababa

Status: Approved (Phase 1 complete)

Confidential - SABA CODERS / Coopbank internal use

1. Overview

1.1 Purpose

MaatiiLink is an internal web platform for Cooperative Bank of Oromia that connects 753+ branches to Head Office (HO) with structured daily operations data, incidents, policy acknowledgments, and internal support tickets.

1.2 Users

ID	Requirement	Pri
Persona	Role enum	Location
Branch teller / ops	BRANCH_STAFF	Branch
Branch manager	BRANCH_MANAGER	Branch
District supervisor	SUPERVISOR	Field / HO
HO ops / IT / compliance	HO_ADMIN	HO
Internal audit	AUDITOR	HO (read-only)

1.3 Success criteria (MVP)

- Branch manager submits EOD same day before cut-off (default 18:00 Addis).
- Supervisor sees all branches in district with on-time % and open incidents.
- HO publishes directive; branch acknowledgment logged with user + timestamp.
- Internal ticket has status + assignee visible to branch and HO.
- Every create/update on business entities writes AuditLog.

2. Assumptions (discovery)

SABA CODERS documents bank reality from public info and standard branch ops. Validate with real staff when possible.

ID	Requirement	Pri
ID	Assumption	
A1	EOD uses paper, Excel, or WhatsApp to district office	
A2	Incidents phoned or messaged ad-hoc	
A3	HO circulars emailed/printed; no proof every branch read	
A4	IT/facility requests have no shared ticket number	
A5	Supervisors oversee 10-40 branches; need one dashboard	
A6	No customer account data in MaatiiLink v1	

3. Functional requirements

3.1 Authentication (Sprint 1)

ID	Requirement	Pri
AUTH-1	Email + password login	P0
AUTH-2	Session cookie, HTTP-only, secure in production	P0
AUTH-3	Role-based redirect after login	P0
AUTH-4	Deactivated users cannot login	P0
AUTH-5	Password change (manager/admin)	P1

3.2 Digital EOD (Sprint 2)

ID	Requirement	Pri
EOD-1	One EOD per branch per calendar day	P0
EOD-2	Fields: date, cash bands, anomalies, complaints, staffing	P0
EOD-3	Status: DRAFT -> SUBMITTED -> LOCKED	P0
EOD-4	Only BRANCH_MANAGER or HO_ADMIN can submit	P0
EOD-5	History list last 30 days for branch	P0
EOD-6	Cash bands as ranges (0-50K, 50K-200K, 200K+ ETB)	P0

3.3 Incidents (Sprint 3)

ID	Requirement	Pri
INC-1	Create: category, severity, title, description	P0
INC-2	Categories: FRAUD, DOWNTIME, CASH, SECURITY, DISPUTE, OTHER	P0
INC-3	Severity: LOW, MEDIUM, HIGH, CRITICAL	P0
INC-4	Status: OPEN -> ESCALATED -> RESOLVED -> CLOSED	P0
INC-5	CRITICAL auto-flags on supervisor dashboard	P0
INC-6	Attachment upload (max 5MB, pdf/jpg/png)	P1

3.4 HO Directives (Sprint 3)

ID	Requirement	Pri
DIR-1	HO_ADMIN publishes title, body, deadline, isCritical	P0
DIR-2	All branches see active directives	P0
DIR-3	Manager acknowledges once per branch per directive	P0
DIR-4	Critical: optional 3-question quiz	P1
DIR-5	Overdue acks on supervisor dashboard	P0

3.5 Service desk (Sprint 4)

ID	Requirement	Pri
TKT-1	Categories: IT, FACILITIES, CASH_LOGISTICS, OTHER	P0
TKT-2	Priority + status workflow OPEN to CLOSED	P0
TKT-3	HO_ADMIN assigns assignee	P0
TKT-4	SLA display by priority (24/48/72/168 hours)	P1
TKT-5	Branch sees own tickets; HO sees all	P0

3.6 Supervisor dashboard (Sprint 4)

ID	Requirement	Pri
DASH-1	Table: branch, EOD status, incidents, overdue directives	P0
DASH-2	Filter by district/region	P1
DASH-3	Export CSV for audit sampling	P1
DASH-4	AUDITOR: read-only view + audit export	P0

3.7 Audit log (Sprint 1+)

ID	Requirement	Pri
AUD-1	Log LOGIN, LOGOUT, EOD_SUBMIT, INCIDENT, DIRECTIVE_ACK, TICKET	P0
AUD-2	Fields: userId, action, entityType, entityId, metadata, time	P0

4. Out of scope (v1)

- Core banking balances / transfers
- Merchant Nation / merchant data
- Customer PII (account numbers, phone)
- Mobile native apps (responsive web only)
- Offline sync (Phase 7 backlog)
- Amharic / Afaan Oromo UI (Phase 9 backlog)

5. User stories (summary)

Branch manager: Submit today's EOD before 6pm so the supervisor does not call on WhatsApp.

Supervisor: See which branches missed EOD or have CRITICAL incidents the same day.

HO admin: Publish a compliance circular and see which branches acknowledged before deadline.

Branch staff: Open an IT ticket when equipment fails so HO IT has a ticket ID.

Auditor: Export audit logs for a date range without editing any record.

6. Acceptance criteria (MVP release)

- All P0 requirements implemented and tested on staging.
- npm run build passes; /api/health returns database connected.
- Happy path: EOD submit, incident, directive ack, ticket.
- Security: all /api/* routes check session + role except /api/auth/login and /api/health.

7. Approval (Gate G1 - SABA CODERS)

ID	Requirement	Pri
Role	Name	Date
SABA	Team	May 2026
CODERS		

Status: Approved. Optional Coopbank staff validation before pilot.
